**Second Announcement**  
**15<sup>th</sup> International Workshop**  
**on**  
**Operations Research**

*Models and Methods for Information Management And Decision Making*

**Havana (Cuba), May 29-June 2, 2023**

*Organized by*

*Universidad de La Habana*

*Université Paris I, Panthéon-Sorbonne*

*Co-sponsors*

*Sociedad Cubana de Matemática y Computación-Asociación Cubana de Investigación Operacional*  
*Asociación Latinoamericana de Investigación Operativa*

**Aims of the Workshop**

This workshop intends to provide a platform for discussing about new theoretical and practical results on the area of OR, mainly focused on decision making problems and management of the required information for such process. The workshop welcomes contributions on mathematical and computational methods of statistics, optimization, numerical mathematic, soft computing, big data sciences and business intelligence, to support decision making process in problems of human health, environment, economics and regional development so as experiences on OR education for promoting innovation and research interests in the students. Cross-fertilization between different topics of the OR and Computer Sciences, are also expected. Tutorials read by well-known specialists will take place on May 29<sup>th</sup> –May 30<sup>th</sup>.

We invite researchers to organize special sessions devoted to one specific topic or on the applications.

A social program will be also offered. It will include the opening activities on May 29<sup>th</sup>, Cuban music, a tour for significant places of the university tours, the closing activities on June 2<sup>nd</sup> and other options.

**The Workshop covers contributions on:**

Biomathematics	Numerical Analysis
Biostatistics	Optimization
Big Data & Business Intelligence	Operations Research Education
Application in the Economy	Probability & Statistics
Logistics	Soft Computing
Management Sciences	Applications in Medicine
Multicriteria Decision Making	Applications in Environment
